

Packaging 25 litres, 5 litres, 1 litre

Any type of wood exposed outdoors needs a suitable protection. The effects of solar rays, rain and humidity shortens life utility of the wood elements, therefore a protection becomes essential.

Our product avoids these disagreeable effects because besides to contain oils and filters UV and HALS, it contains natural waxes that protect against rain and the humidity without losing transpirabilidad and the natural aspect.

In the photography the behaviour of a drop of ink can be appreciated to fall on a treated white wood (the drop does not dunk) and without treating (the drop is absorbed)

APPLICATION:

They can be applied brush, roller and spray.

Quantities between 150/200 cc by m² that it can change according to the absorption of the treated wood.

Wood **with** application

Wood **with no** application
